

# Daniel Xie

(519) 300-2863 • [danxie2001@gmail.com](mailto:danxie2001@gmail.com) • 2290 Suzanne St., Lasalle, ON

## Education

---

<b>University of Western Ontario, London, ON</b> Bachelor of Engineering Science in Computer Engineering, 3.1 GPA.	<b>(2019-present)</b>
---	-----------------------

## Extracurricular Activities

---

<b>Western Formula Racing Team Member</b>	<b>(2019-present)</b>
---	-----------------------

- Was a team recruit involved in building an electric racing car in the 2019-2020 season and a member electrical traction team in the 2020-2021 season.
- Gained knowledge and hands-on experience in wiring the accumulator system, designing PCBs (Printed Circuit Boards) and using CAD tools such as SolidWorks and Eagle Autodesk.
- Successfully designed a DC-DC converter PCB to convert ~500V to 12V for GLV system to meet FSAE safety guidelines.

---

<b>Western AI member</b>	<b>(2019-present)</b>
--------------------------	-----------------------

- Was a member of the business applications team that helped create a Long Short-Term Memory neural network model in Python to predict stock prices. During the summer of 2020, was a member of a medical-imaging team that created a VGG16 model for diagnosing different stages of Alzheimer's disease based on an MRI image. Currently a member of another medical imaging team currently exploring an X-ray scan dataset of 14 different diseases.
- Helped solve a variety of debugging issues and gained hands-on experience and knowledge developing linear regression models and neural networks.
- Was able to refine skills to find an optimized set of weights and preprocessing to consistently achieve greater than 95% accuracy with the VGG16 model.

---

<b>Participant in Hackathon and Programming Competitions</b>	<b>(2018-2020)</b>
--	--------------------

- A team member in two hackathons and one programming competition.
- At the University of Windsor 15th Regional Secondary School Programming Competition, I leveraged my problem-solving skills to come up with ideas for solutions that helped us win the competition. Our solutions were done in Java.
- At Massey Hacks V, after my team's initial plan turned out to be unviable due to unforeseen circumstances, I came up with new project ideas to implement within a limited remaining time. We successfully implemented our solution in C++ and placed in the top five overall.
- At Starter Hacks, I collaborated with my teammates to plan and develop a geolocation interactive app implemented in Java. Although we did not place, we received positive feedback from our judges for our design.

## Skill Set

---

<b>CAD/ECAD Tools</b>	Onshape, SolidWorks, Eagle Autodesk
<b>Programming languages</b>	Python, Java, MATLAB, C, C++, Rust
<b>Development Environments/Tools</b>	IntelliJ, Microsoft Visual Studio Code, Microsoft Visual Studio, Pycharm, Google Colaboratory, Jupyter Notebook, Android Studio, MATLAB, Arduino IDE
